WORK EXPERIENCE

Amazon.com, Region Flexibility Engineering – Routing and Connectivity, Seattle, WA

May 2018 – Current

Senior Software Development Manager

I built and led a 25 person organization, spread across three development centers, to deliver global service connectivity and routing infrastructure. Amazon uses our infrastructure across 40k+ services to centrally manage where in the world compute is performed in order to improve latency/resiliency/cost, launch novel customer experiences, and comply with legal constraints.

- Supported service migrations for Amazon.cn and Amazon.in marketplaces across AWS regions
- Cellularized Amazon's internal configuration store across 40k+ clients – enabling ongoing horizontal scaling
- Enabled Selling Partner Services to scalably grow their 400+ service portfolio over new marketplaces
- Led multi-prong routing client adoption strategy
 - Delivered native clients for amazon frameworks across Java, Python, and Ruby via our own core GoLang library
 - Integrated our routing client into common networking sidecar and build tools (injection at build time)
 - Led largest ever automated client adoption campaign at Amazon (25% of all Java client instances)
- Led operational excellence program across parent org resulting in multi-year 100% uptime operational record
- Drove consensus across Senior Principal Engineers and Directors on multi-year plan to programmatically coordinate data migrations and service routing – resulting in funding of coordinated data migration org
- Primary author on patent application concerning organic service graph healing
- Executed full HR lifecycle for SDEs and SDMs – hired, coached, fired, and promoted up through SDM/SDE III

Amazon.com, Amazon Pay – CommerceX, Seattle, WA

August 2016 – May 2018

Software Development Manager

I built and led a 10 person team in pioneering next-gen physical-world shopping experiences. We delivered seamlessly unified online + physical-world shopping experiences for Amazon businesses and external corporate customers .

- Delivered in-person customer recognition, order ahead, and payment experiences: (1) Amazon Mall Kiosks and Amazon Books Stores via partnership with Clover and (2) TGIFridays through partnering with their own tech organization
- Prototyped and pitched plans for mobile-enhanced physical-world shopping experiences to various corporate customers
- Secured headcount funding alongside Principal Product Managers by designing, prototyping, and demonstrating a next-gen Amazon Pay enabled “date night out on the town” customer experience to Amazon Leadership

Unii, Ltd., London, United Kingdom

September 2015 – May 2016

Chief Technology Officer

I led a 25 person tech organization in developing a 300k+ MAU social media app across iOS and Android platforms.

- Instituted various user experience improvement processes: recurring app usage video and app performance goal reviews, on-call and post-mortem procedures, an internationalization initiative, and mentored an employee into Head of Product
- Established company guidelines for technical roles, levels, and recruiting procedures – oversaw all recruitment, promotions, dismissals, and career path changes – led corporate application with UK HMRC to sponsor work visas
- Reduced costs via platform migrations, workforce reductions, and renegotiations with tech suppliers and office landlord

Amazon.com, Digital Device Sales, Seattle, WA

August 2011 – August 2015

Software Development Manager, Technical Program Manager, and Software Development Engineer

I led a 10 person team to deliver novel buying experiences for Amazon's digital devices (e.g. Kindle, Echo, Fire Phone, etc.). I scaled our sales platform to support 15+ merchandisers and four generations of device launches for 1k+ SKUs and 12 countries.

- Introduced cross-company device buying experiences such as free Prime with purchase and phone plan integration
- Built merchandised content replication, scheduling, and launch automation for new marketplaces and devices
- Sustainably collaborated across various device and marketplace Product Managers, Program Managers, and Merchandisers – supporting launches and delivering features while effectively reducing operational costs

Amazon.com, Retail Website – Product Detail Pages and Relationships, Seattle, WA

July 2008 – August 2011

Software Development Engineer

I launched innovative buying experiences and optimized performance across Amazon's 1B+ product detail pages. I independently delivered a revamped diapers buying experience on mobile and desktop. I mentored junior engineers.

EDUCATION

Purdue University, West Lafayette, IN

Fall 2004 – Spring 2008

Bachelor of Science – Double Major Computer Science and Mathematics – Certification in Entrepreneurial Studies

- Internships at Amazon.com, Sun Microsystems, J.P. Morgan, Solutions4Networks, and Datachek
