Jonathan Micklos

Software Engineering Manager @ Bellevue, USA

2025

Performance Review

Paul Wright • Software Engineering Manager

Submitted 2025-07-31

Rationale for the performance rating Jonathan received.

In H1 you drove impact through your projects, such as BioAuth-UX and X-Device-Login, as well as your collaboration with cross-functional teams and partners. You also turned around key people management issues from your first Pulse review and collaborated well with new XFN partners and other teams.

As a result of your efforts you earned an At or Above Expectations (AA) signal, which reflects your strong performance and the value you've added to the team and organization.

How is Jonathan's impact tracking relative to their goals so far this year?

Include impact achieved, progress against business goals, and [contributions to how we work at Meta](#).

Team Impact

- **BioAuth-UX:**
 - **Drove** BioAuth-UX delivery through IC5-DRI and three other ICs. Delivered VP PoC demo(January) and [production-progress Settings/Lockscreen/Biometric-Prompt\(June\)](#).
 - **Maintained roadmap** with BioAuth V-Team (HAL/ML/HAX teams)/IC7-TL and local-XFNs. Drove alignment with [leadership](#). Effectively/incrementally shifting project management approach/HC-funding as program shifts from (1)early PoC+steel-thread to (2)formalized requirements set.
 - **Repeatedly derisked/unblocked/adjusted roadmap** addressing technical blockers and changes to core dependencies/program expectations(e.g. pismo deprioritization,on-don flux). Escalated bug-fixes to SMEs across company (e.g., [java runtime bug](#)). Drove ongoing support (along with IC7) from other ICs/people leaders (e.g., [VRShell,Runtime](#)).
 - **On-Track** for [September dogfooding ship-goal](#)
- **X-Device-Login:**
 - **Drove delivery** of X-Device-Login experiences for 1st-time login (browser:v82, apps:v83) across IC5-DRI and IC3. X-Device [QR-Code](#) and [Passkeys](#) are dogfooded both, on-track for v81, but shelved for v82.

- **Influenced architecture** to support Media IC6 delivery of x-device API buildout for v83
- **On-Track** for [5% MAU use goal](#) and x-device passkeys for apps in v83.
- **Credentials Manager Dogfoodable Components:**
 - Drove delivery Credentials Management roadmap through IC5-DRI. Passkey Credentials-Management in browser on-track for v83 (early [dogfooding](#)).
 - **On-track** to deliver [credentials manager and passkeys ship-goals](#)
- **PINSanity Reduction:**
 - **Off-track** to deliver [store-PIN migration to passcode by EOY](#). Biometric-Prompt(dependency) will be in dogfood-state only after v83 feature complete date (last release 2025). Driving IC6 to deliver Passcode UX consolidation and hardening program with Biometric-Prompt for Q1 PINSanity delivery.

Collaboration

- Partnered with Media and Browser teams to drive the 3P-media-app-login strategy, including [instituting a two-day onsite](#) to identify strategic bets and jointly [authoring a roadmap](#) with XFN and direct EM.
- Good feedback from peers
- Fostered collaboration with partners (e.g., [Prime Video](#), [Amazon Music](#), Disney Plus, YouTube) to develop and drive adoption of login solutions, aiming for [a 5% goal](#) and [Media expansion objectives](#).
- Helped onboard Rafael to A&P team areas and eng

Org Impact

- Led the [H2'Planning Onsite](#) for the APE Organization, ensuring teams were prepared and delegated responsibilities.
- [Pismo-Shiproom-DRI](#), joining the Release-Shiproom-DRI rotation and shadowing since v78.
- Continued as a [Sev-Review-Moderator](#).
- Referred an IC6 Data-Engineering candidate.

How well did Jonathan support their team and enable them to achieve impact?

Reference your observations, manager feedback (scores and written) and [Meta People Management Skills](#). Include examples.

People Management

Pulse

- Team&PersonalExperience: 58% (+10)

- ManagerExperience: 79% (+30)
- BE:57%
- BD:57%
- Satisfaction:71%, BestWork:43%, IntentToStay: 83%
 - **Delivered All 2024'H2 Items**** **including instituting recurring BizOps Review with team, a refined team-wide project management process, and a commitment to clarified communication with specificity on whether asks are optional opportunities or expectations.
 - **Generally Improved Team Scores** – average of +10%/+30%/+14% for Team & personal experience, Manager experience, and Better engineering respectively. Lowlights include -14% for Best work Growing team
- Hired IC4 and IC5, 2 more at offer stage
- Onboarded 2 new IC4 + transferred IC5
- Managed out underperforming IC4 in February event
- High confidence IC3->IC4 promo in midcycle
- Effectively coaches team: e.g. Coached IC5 on strategy for the X-Device program. Details are in the [people management section](#).
- Ensured operational sustainability, including instituting a [month-long team-wide Quality Lockdown](#) to address quality issues.
- Feedback from eng: Jonathan asks team for unrealistic timelines or does not align on eng estimates/workbacks for commitments
 - team felt morale hit by canceled release after crunching to pull up impact
- Engineers who changed teams left loose ends without clear handoff, causing disruption to the team

What are 1-3 strengths Jonathan demonstrated?

Use the [Career Expectations Explorer](#) to help you describe how well their actions align with expectations or skills.

- **Collaboration and Partnership:** You've demonstrated a strong ability to collaborate and partner with cross-functional teams and partners, including driving the 3P-media-app-login strategy and collaborating with partners to develop and drive adoption of login solutions.
- **Leadership and People Management:** You've shown strong leadership and people management skills, responding well to feedback and acting on it promptly
- **Impact and Results:** You've consistently delivered high-quality results and driven impact through your projects, including BioAuth-UX and X-Device-Login.

How can Jonathan increase their impact? Describe 1-3 areas they can grow or improve.

Use the [Career Expectations Explorer](#) to help you describe growth or improvement areas.

Continue building relationships with your team members and making sure they feel recognized for their work and understand why it is impactful.

Make sure engineers feel heard and bought in to any specific timelines or goals. If there is urgency it should be deliberate and a group effort to get there, not ambiguous or accomplished through reluctant heroics.

Pay particular attention to any explicit action items or commitments you make and make sure you keep them yourself and hold your teammates accountable, this is essential for a high trust and high performing team.

Continue positive progress to: Align milestones to metrics or concrete and easily testable experiences.

Longer form anonymized feedback with concrete examples:
