Jonathan Micklos

Software Engineering Manager @ Bellevue, USA

2025

Self Review

Jonathan Micklos • Software Engineering Manager

Submitted 2025-06-30

What impact have you achieved so far?

Include impact achieved, progress against business goals, and [contributions to how we work at Meta](#).

Team Impact

- **[On-Track:4IC]BioAuth-UX:**
 - **Drove** BioAuth-UX delivery through IC5-DRI and three other ICs. Delivered VP PoC demo(January) and [production-progress Settings/Lockscreen/Biometric-Prompt\(June\)](#).
 - **Maintained roadmap** with BioAuth V-Team (HAL/ML/HAX teams)/IC7-TL and local-XFNs. Drove alignment with [leadership](#). Effectively/incrementally shifting project management approach/HC-funding as program shifts from (1)early PoC+steel-thread to (2)formalized requirements set.
 - **Repeatedly derisked/unblocked/adjusted roadmap** addressing technical blockers and changes to core dependencies/program expectations(e.g. pismo deprioritization,on-don flux). Escalated bug-fixes to SMEs across company (e.g., [java runtime bug](#)). Drove ongoing support (along with IC7) from other ICs/people leaders (e.g., [VRShell,Runtime](#)).
 - **Became Pismo Shiproom DRI** to derisk development on Pismo after Pismo [system-support-deprioritization](#)
 - **On-Track** for [September dogfooding ship-goal](#)
- **[On-Track:2IC]X-Device-Login:**
 - **Drove delivery** of X-Device-Login experiences for 1st-time login (browser:v82, apps:v83) across IC5-DRI and IC3. X-Device [QR-Code](#) and [Passkeys](#) are dogfooded both, on-track for v81, but shelved for v82.
 - **Influenced architecture** to support Media IC6 delivery of x-device API buildout for v83
 - **On-Track** for [5% MAU use goal](#) and x-device passkeys for apps in v83.
- **[On-Track:2IC]Credentials Manager Dogfoodable Components:**
 - Drove delivery Credentials Management roadmap through IC5-DRI. Passkey Credentials-Management in browser on-track for v83 (early [dogfooding](#)).
 - Recently added IC5 to accelerate timelines and add support for passwords in 2026'Q1.

- ° **On-track** to deliver [credentials manager and passkeys ship-goals](#)
- **[Off-Track:1C]PINSanity Reduction:**
 - ° **Off-track** to deliver [store-PIN migration to passcode by EOY](#).
Biometric-Prompt(dependency) will be in dogfood-state only after v83 feature complete date (last release 2025). Driving IC6 to deliver Passcode UX consolidation and hardening program with Biometric-Prompt for Q1 PINSanity delivery.

People Management

- **Hired/onboarded** external IC4([announce/plan](#))/internal IC5([announce/plan](#)). Have offers out for two external IC4s. Onboarded two IC4s and one IC5 from sister team. Worked through two to refine onboarding process and trial run with aforementioned internal/external hires.
- **Coached/identified for termination** IC5 in February RIF due to lack of effective goal setting/driving/escalation.
- **Coached/proposed promotion** for IC3=>IC4 for H1'2025 cycle.
Coached/supported/nurtured strong full-circle ownership to drive UX improvements with XFN and more senior engineers.
- **Coached IC5 on strategy** to effectively organize X-Device program/code/story as foundational components that can be built upon for various user experiences.
- **Prioritized alongside TL(IC6)** to optimize her impact across team strategic bets while providing a path to exceeds EOY2025.
- Pulse:
 - ° **Delivered All 2024'H2 Items** including instituting recurring BizOps Review with team, a refined team-wide project management process, and a commitment to clarified communication with specificity on whether asks are optional opportunities or expectations.
 - ° **Generally Improved Team Scores** – average of +10%/+30%/+14% for Team & personal experience, Manager experience, and Better engineering respectively. Lowlights include -14% for Best work and generally low numbers compared to the company that while improving quickly (in general) need to continue to do so.
- **Ensured operational sustainability of team** when IC5 termination resulted in ownership gap. [Instituted and delivered month-long team-wide Quality Lockdown](#) on advice of team TL. Incorporated support of larger BioAuth IC7 TL.
- **Ensured predictable delivery and project management expectations** by carrying forward and refining team-wide [program management](#) and [IC level expectations](#) established in 2024'H2.
- **Met dogfooding expectations:**
 - ° Team:[13/16wks](#)
 - ° Personal:15/16wks
- **Continued to ensure team has mentors**
- **No regretted attrition** within my control(e.g. not RTO)

Collaboration

- **Continued driving 3P-media-app-login strategy** alongside Media+Browser teams from opportunity I identified in 2024'H2. Instituted/led [two-day onsite](#) with Browser/Media to identify strategic bets/priorities/joint goals. Jointly [authored/drove leadership approval of roadmap](#) w/ XFN/direct EM.
- **Media:** Partnered w/ [Jay Raj](#)(PM)/partner-engineering/media-team to meet w/partners([Prime Video](#),[Amazon Music](#),[Disney Plus](#),[YouTube](#)) and develop/drive adoption of login solutions([our 5% goal](#) and [Media expansion objectives](#)). Fostered collaboration resulting in (1)HAX/Media/Sharing [hackathon DIAL](#) project(now YouTube/Disney proposal) and (2)Media-TL building HzOS App Login API on top of our QR-Code work for Amazon.
- **Browser:** Partnered on v82/v83 browser login features(see Impact). [Clarified option space](#) delivering common Credentials-Manager post-v83 and drove consensus. Browser will now ship cloud persistence to migrate keystore (reducing roadmap-cost/timelines).
- **Clarified App-Lock E2E UX ownership** with/across Shell/Navigator/HAX. Set precedent for other Biometric Prompt 1P integrations.
- **Worked alongside BioAuth IC7-TL / through local IC5 DRI** to keep project unblocked and appropriately funded/structured against continuously-evolving landscape(see impact).

Org

- **Led H2'Planning Onsite for APE Organization.** Ensured teams prepared. delegated responsibilities(e.g. dinner planning). Worked alongside TLs to plan. Drove [presentation](#) creation.
- **Became [Pismo-Shiproom-DRI](#).** Will join Release-Shiproom-DRI rotation(shadowing since v78)
- **Continued as [Sev-Review-Moderator](#)**
- **Supported hiring** by recommending IC6 Data-Engineering candidate; endorsing IC6 candidate(previous coworker).

What are 1-3 strengths demonstrated (work you most enjoyed and excelled at)?

Use the Meta Skills or [expectations](#).

1. **Identifying/Driving Opportunities:** Identified media opportunity in 2024. Leveraging partnerships with Media/Browser to force multiply/reduce delivery cost. Brought stakeholders together repeatedly for strategy(offsites/roadmap-planning).
2. **Helping others Scale/Delegate Delivery:** Previously developed expectations/best-practices for program management across IC levels. Mentoring ICs to deliver through others. Have balanced line of strict-expectations with general patterns to enable individual IC of self-defined processes.
3. **Ensuring Operational Health:** Instituted Quality Lockdown and various mechanisms to keep an eye on operational health. Driving BE roadmap for H2.

What are 1-3 areas you are intentionally working on this year to grow or improve?

Use the Meta Skills or [expectations](#).

1. **Org-Level Impact and Cross-Org Delivery:** Double down investment in sev-review/ship-room-DRI.
 2. **Cross-Org Alignment:** Continue cross-org alignment investments.
 3. **Reduce Program-Management Overhead/Improve Efficacy:** Refine existing PM processes with team to reduce overhead cost and identify risk earlier on. Scale to APE-org for PM one-stop-shop.
-
