Jonathan Micklos

Software Engineering Manager @ Bellevue, USA

2024

Self Review

Jonathan Micklos • Software Engineering Manager

Submitted 2025-01-08

What impact have you achieved in 2024? Include impact achieved, progress against business goals, contributions to efficiency initiatives, and [building internal community](#)

Team Impact

- **Deliver VR Countdown goals and set Next-Step Expectations with Leadership:** Drove exit/handoff of all stated VR countdown goals by EOY(Login Reliability/Usability, Regin Usability, Registration Reliability). Heavily-leaned-on [Christina Leichtenschlag](#) for program-management and [exit plan](#)/handoff of some goals to RLAA for 2025 ongoing ownership, and [Isabella Knox to help define why Regin was not worthy of further investment](#). Led [Reid Miller/Jimmy Dong/Connor Carlson](#) for the individual goal deliveries.
- **Improve Usability of Passcode:** Led [Austin Riopelle to define success criteria and deliver on goal for EOY](#). Includes unifying Passcode UIs, delivering “Premium-Feel”, and providing 1P/3P foundation for Bioauth while guardrailing on same-day unlock rate.
- **First Party Password Manager:** Led [Christina Leichtenschlag](#) to develop a credentials manager 2024 playtest for leadership alongside 2025 roadmap. Both were delivered.
- **BioMetric Unlock:** Led [Reid Miller](#) to deliver BioAuth unlock demo across three-other-ics for Pismo Program. Coordinated with [Vietlong/Reid](#) on 2025 roadmap definition.

People Management

Team Overall

- **[Drove/Implemented/Delegated]IC Level/Roadmap Triage/Program Management Process Expectations:** Developed framing for [program management/IC level expectations](#), and developed presentation on [program management/communication](#) patterns/best practices. Aligned with org-internal/external managers on calibration. Applied practices on team with XFN support. Adopted most clearly by [Reid Miller](#) to ensure BioAuth on track. Beginning to extend across larger Privacy/Auth org. Delegated scrum process improvement to [Andres Rama](#).
- **[Delegated]Self-Debugging for Common Auth Issues:** Delegated to [Jimmy Dong](#) and coached on working-backwards toward [cogent plan](#). PRD delivered, but implementation paused in exchange for BioAuth.
- **[Mostly No-Op]Mentorship:** Ensured all team members have mentor through

org-wide program.

Per-Person

- **[Christina Leichtenschlag](#)**: Empower Exceeds Opportunity in 2024: Ensured her focus could remain on key deliverables/opportunities and that I could otherwise reduce overhead of leading others via better delegation. Did so.
- **[Austin Riopelle](#)**: Support toward 2025Q1 Promo: Continually coached on effective working backwards/clear prioritization/clear communication working backwards from measurable goal. Started to demonstrate end of Q4. Promo is not certain.
- **[Andres Rama](#)**: Coach on Delivery Effectiveness and Perception: Coached on how to review account deletion survey delays and patch systemic issues with process improvement, and how to improve perception/lost trust by off-hand complaining less and delivering more raw impact. Has followed advice and delivered on Passcode UI Unification. Succeeding.

Collaboration

- **[Drove] 3P Media App Login Strategy/Started Auth-All-Up Strategy**: After meeting [Nitesh Asnani](#), identified and drove opportunity to drive credentials management roadmap through 3P app login. Developed plan alongside XFN/[Christina Leichtenschlag](#) for [app login roadmap/experimentation](#) and drove consensus with leadership.
- **[Drove/Delegated] Support XR Tech w/ BioAuth UX**: Led [Reid Miller](#) to develop plan and lead delivery for [BioAuth PoC by EOY](#) w/ Pismo program.
- **[Collaborated]**: Consumer Countdown Exit alongside [B Gonzalez-Lesser](#). Effectively worked with countdown to establish limited opportunity space.
- **[Delegated] Team Boundary Clarification**: Led Austin Riopelle to drive Auth Teams [oncall split](#).
- **[Helped] Support VR Countdown with RLAA**: Worked alongside [Christina Leichtenschlag](#) to clarify ownership of VR Countdown Login/Registration dependencies with RLAA and once blocked on meeting goals, driving redefinition and transfer of goal ownership to RLAA with consensus across both leadership chains.
- **[Helped] Support F3 Migration with RLAA/CAMigration teams**: Worked alongside [Christina Leichtenschlag](#) and [Amit Ranjan Kumar](#) to clarify needs to support FBAU accounts for F3 and develop 2025 roadmap for RLAA support.

Org

- **Sev-Review Moderator**: Became one and have received positive feedback on my systemic recommendations for follow-ups.
- **System Problem Review**: Put together a number of “dirty-laundry” org-level discussions for identifying and driving next steps on systemic concerns within Authentication and Privacy. Need to follow-up in 2025.
- **Identified External Candidates for Internal Opportunities**: One IC6+ for Media Experience – connected them with Nitesh. One PM candidate, discussed the open opportunity with them.

- **On-Sites:**

- Participated in an org-level onsite presenting about the team.
- Participated in BioAuth onsite, presenting about the team, and helped drive all-up roadmap.

Share 1-3 strengths (work you most enjoyed and excelled at). Use the Meta Skills or [expectations](#).

1. Identifying and Driving Opportunities: Started to identify and independently drive roadmap opportunities alongside other teams (e.g. Media Access 2025 Roadmap). Have otherwise effectively driven triage and delivery of other initiatives (e.g. VR Countdown and BioAuth). Have effectively worked alongside XFN for effective prioritization of work.

2. Helping others Scale/Delegate: Developing expectations/best practices for program management across IC levels. Beginning to extend across larger Privacy/Auth org. Hands-on effectively coached L4 L5 engineers with improvements across BioAuth and Passcode. Have balanced line of strict-expectations with general patterns to enable individual ownership by ICs of their own processes.

3. Root Cause Analysis/Problem Triage/Driving Systemic Fixes: Have effectively strategized responses to VP level escalations (e.g. Consumer Countdown) to successful exit without significant team involvement. Have identified and begun to plug program management gaps in team/org (see above). Joined Sev-Review rotation and have received supportive feedback on my review-feedback for systemic fixes.

What are 1-2 areas you are intentionally working on to grow or improve? Use the Meta Skills or [expectations](#).

1. Org-Level Impact: Double down on sev-review w/ systemic fixes. Identify ways to adopt/spread faster releases like release trains. Continue PM process work.

2. Develop Stronger Relationships with/for the Team: Better connect with XFN and related team leadership and connect those leaders with team for opportunities. Improve sense of connection on team.
