Jonathan Micklos

Software Engineering Manager @ Bellevue, USA

2025

Self Review

Jonathan Micklos • Software Engineering Manager

Submitted 2026-01-07

What impact have you achieved in 2025? Include impact achieved, progress against business goals, and [significant contributions to how we work at Meta](#), which includes AI-driven impact, smart risk-taking and effective teamwork.

Team-Impact

- **EyeUnlock-UX:**
 - **Drove on-time-delivery** through IC5-DRI+six other ICs:
 - VP-PoC/demo(January)
 - Pismo Integration Fishfooding Support w/ Single-Stage Enrollment:
 - [M3.1:INSECURE\(August\)](#)
 - [M3.3:SECURE\(November & ahead of schedule\)](#)
 - **Drove Roadmap** alongside BioAuth V-Team (HAL/ML/HAX teams)/IC7-TL & local-XFNs. Drove alignment w/[leadership\(roadmap,pattern-deprecation\)](#). Effectively/incrementally shifted project management approach/HC-funding/DRI as program shifted(early PoC+steel-thread to formalized requirements set). Drove alignment through team/XFN on 2026 roadmap to deliver for Phoenix([GSD, commitments,team-wb-plan,XFN-TPM-plan](#)).
 - **Repeatedly derisked**
 - Unblocked/adjusted roadmap/clarified ownership addressing technical blockers & changes to core dependencies/program expectations(e.g. pismo deprioritization,on-don flux).
 - Escalated bug-fixes to SMEs x-company(e.g.,[java runtime bug](#)).
 - Drove ongoing support(with IC7) from other ICs/people leaders(e.g. [VRShell, Runtime](#))
 - Ensured clear [HAL support through Pismo/Phoenix Transition](#) for eng/UXR needs.
 - Swapped IC4 for IC5 [derisking sudden/ambiguous multi-stage enrollment requirement](#)
 - Clarified HAX owns BiometricPrompt(not BiometricPrompt clients like [App-Lock UX owned by NAV](#))
 - **On-Track** for [H1-M6/M9 deliverables](#)
- **3P-Login:**

- **Drove on-time delivery** through IC5-DRI+four other ICs:
 - X-Device-Passkeys(browser)([experiment v81](#);[shipping v85](#))
 - led to [relative +2.7% VR 1D TS & +2.7% TS compared to holdout, estimated ~0.0656% improvement to topline VR engagement](#)
 - [MPR 3.5\(A-\)](#)
 - X-Device-QR-Code(browser)([v83 experiment](#))
 - [patent pending](#)
 - [MPR 3.5\(A-\)](#)
 - 3P-Login-API(apps)([launched v83](#))
 - Amazon Music [launching 01/15](#)
- **Identified Opportunity/Partnered on Delivery** w/Browser & Media teams
 - Aligned [w/partner DRIs for strategy-across-partners](#)
 - Influenced architecture to support Media IC6 delivery of x-device API buildout for v83([thanks1](#),[thanks2](#))
 - Drove alignment w/leadership([roadmap,update/align w/ Vishal,core-ux leads prioritization,1P-CM support steer](#))
 - [5 of top 10 websites on quest browser now supported with x-device-login-solutions](#). All will be supported by EOH1 2026.
 - [13 of the top 15 media partners are expected to utilize HAX login solutions](#)
 - Drove alignment w/team/XFN/Browser-Team/Media-Team/RLTrust on 2026 roadmap to deliver Credentials Manager for Phoenix([GSD,commitments, team-wb-plan,post](#)).
- **Impact delivered**, regardless, did not meet [5% MAU use goal \(1.12% of MAU in December\)](#)
- **Relogin:**
 - **Maintained guardrail**:same-day-relogin-success>=45%(55.93%@EOY)
 - [Ship](#):Magic-Link-2.0 (+3.07% same-day-relogin-success rate)
 - [Experiment](#):Device code reuse(+1.46% same-day-relogin-success rate)
- **PINSanity-Reduction:**
 - **Did not deliver** store-PIN migration to passcode by EOY. Instead, aligned that store will adopt Biometric Prompt in [EyeUnlock-M9 \(Phoenix readiness\)](#).

People-Management

- Pulse

- Team&PersonalExperience:67%(+19%YoY)
- ManagerExperience:77%(+28%YoY)
 - WouldWorkWithAgain: 90%(+30%YoY)
- BE:70%(+27%YoY)
- BD:53%(+3%YoY)
- Satisfaction:60%(-11%YoY), BestWork:(+3%YoY), IntentToStay(-30%YoY)
 - Delivered All [2024'H2](#) & Most [2025'H1](#) Items, including instituting recurring BizOps Review with team, a refined team-wide project management process, & commitment to clarify if asks are option opportunities or expectations.
 - Generally improved Pulse scores YoY despite [“many neutral responses came from new members who hadn't had enough time to fully evaluate their experience”](#) (as independently noted by team)
- Hired/onboarded three IC4s(external) & one IC5(internal)
- Managed out underperforming IC4 in February event
- Effectively coached team:
 - High confidence IC3->IC4 promo EOY-cycle
 - [IC5 on strategy for the X-Device program](#)/path to IC6
 - IC5 for effective comms/project management([thanks,example](#))
- Effectively balanced ICs across projects to ensure appropriate opportunities/ownership/derisking(e.g. IC4/5 swap for EyeUnlock Multi-Stage Enrollment)
- Incorporated feedback, builds culture, & ensured operational sustainability:
 - **Feedback:Oncall Issues:** Instituted [month-long team-wide Quality Lockdown](#) to address quality issues
 - **Feedback:Tracking projects/dependencies poorly defined:** [Coached IC6 on developing solution\(resulting template\)](#).
 - **Feedback:Lack of Engineer Buy-In:**Ensured engineers self define/own/delegate timelines/goals/deliverables in H2/for 2026 commitments([project-management expectations,process change attribution](#)). Used to influence other team([thanks](#)).
 - **Feedback:EyeUnlock Roadmap Clarification Too Costly:** Owned restructuring/clarifying with team myself([GSD,commitments,team-wb-plan, XFN-TPM-plan](#)).
 - **Feedback:RL-GSD Compliance Changes Too Costly:** Owned reshuffling/migrating GSDs into L4 projects myself([device-locks,3p-login](#))
- [Ensured team has mentors](#)
- No regretted attrition within my control(e.g. not RTO)

Collaboration

- **Identified Joint Opportunities & Drove Outcomes Across Teams:**
 - Partnered with Media & Browser teams to drive the 3P-media-app-login strategy, including [instituting two-day onsite](#) to identify strategic bets & jointly authoring [2025 roadmap](#) & 2026 roadmap([GSD,commitments,team-wb-plan,post](#)) with XFN & direct EM
 - Fostered collaboration with partners (e.g., [Prime Video](#), [Amazon Music](#), Disney Plus, YouTube) to develop & drive adoption of login solutions, aiming for [5% goal](#) & [Media expansion objectives](#)
 - Drove clarity on [zero-knowledge vault plan](#) with RLTrust([clarification,thanks](#)) in order to disambiguate backup/recovery/sync option-space/strategy/roadmap
 - [Ongoing work with Agentic Web team for Credentials Management Support](#)
 - Driving clarity/understanding of [Knockout integration option space](#) to ensure we understand risks v. opportunities
- **Effectively Worked Across XFN for Delivery/Process Improvement:**
 - Worked alongside EyeUnlock TPM & team to [disambiguate/track/drive down blocking dependencies](#), [clarify roadmap](#), & institute [PM GSD structure for RL-L4/L3 tracking](#)
 - [Prioritized 3P CM support alongside productivity XFN](#)
- **Effectively Communicated Updates Independently & w/XFN:**
 - **Operations:**Quality Lockdown([Entering,Update-1,Update-2,Exit](#))
 - **Team&Org Planning & Roadmap:**[Q1 Program Update,HAX H1 Onsite,APE H2 Planning Summit Recap](#)
 - **Progress Updates:**
 - CredentialManager:[V-Onsite Phoenix Workback Plan,Nov'25 Status,Dec'25 Status,1P CM App FYI](#)
 - EyeUnlock:[Bioauth 3.1 Milestone Success,Multistage Enrollment FYI,10/17 Status Update,Phoenix EyeUnlock & VHAL Expectations FYI](#)

Org

- Led the [H2'Planning Onsite](#) for the APE Organization, ensuring teams were prepared & delegated responsibilities.
- CoreUX DRI for:
 - HzOS Release Shiproom
 - Shadow:v78
 - DRI:[v81/v83/v201\(thanks\)](#)
 - [Improved tracking efficiency](#)
 - Ramped [Alexey Sednev](#) as v85 DRI([thanks](#))
 - [Q4 Operational Readiness](#)

- [Pismo Shiproom](#)
- [Sev-Review-Moderator](#)
 - [3/19 Update](#)
 - [8/5 Update](#)
- Referred IC6 Data-Engineering candidate
- Identified & Drove Solves for Common Org Deficiencies:
 - Given repeat leaks(e.g.[S583446](#),[S599797](#),etc.), worked across CoreUX toward short-term leak prevention best-practices([Henry post,notes](#)), & RLTrust for long term solutions([proposal,option-space](#)). Aligned with CoreUX leadership on next steps to drive best-practice adoption in CoreUX first.
 - Working with Settings/RLTrust/HzOS System ([chat,notes](#)) to audit & allow list AOSP Intents to prevent bad UX like inadvertent bricking([S581266](#),[S521997](#)). Next steps will be to audit intent usage post PSC.
- Helped onboard Rafael to org

What are 1-3 strengths demonstrated (work you most enjoyed and excelled at)?

Use the Meta Skills or [expectations](#).

1. Identifying/Driving Opportunities X-Team/Org
2. Helping others Scale/Delegate Delivery
3. Ensuring Operational Health

What are 1-3 areas you are intentionally working on this year to grow or improve?

Use the Meta Skills or [expectations](#).

1. **Delivering Impact via AI:** As written.
2. **Double Down on Support at Org-Level:** Capitalize on DRI work and drive arch/process improvements like AOSP intent allow list and leak prevention.
3. **Double Down on Cross-Org Alignment and Delivery:** Continue to identify 3P login opportunities deliver alongside partners.
4. **Double Down on Reducing Program-Management Overhead/Improve Efficacy:** Continue to empower team with ownership/independence and remove undifferentiated overhead.
